Bioenergetic Imprinter - Instructions

Imprint using both hands

- Turn the unit on, then place hands on the plates.
- While making good contact with the plates, push and release the start switch.
- Do this once per day for 2-3 days, then increase to three times per day. The gradual start is to reduce chance of a Herxheimer reaction.
- After a week one can increase frequency if desired. 5-10 times per day often produces faster results.
- Turn the main switch off after EACH use.

Imprint into the Detox box

- Do this one time, or perhaps once per month.
- The Detox box can then be carried on a string around the neck, or in a pocket. It must be kept clean, use a small plastic bag if kept in a pocket.
